

## WELCOME

Otolaryngology, Head and Neck Surgery has grown by leaps and bounds in the past decade. Today it is recognized as an advanced specialty requiring an in-depth understanding of head and neck science and widest surgical skill sets. The next phase of growth in our specialty has seen the advent of various sub specialties; facial plastic and reconstructive surgery being one of the subspecialty. However, a formal training in facial plastic and reconstructive surgery is lacking in India

We are delighted to inform you that the MS Ramaiah Advanced Learning Center, Bangalore will be hosting the 3rd National Facial Plastic Surgery Course from 1st to 3rd September 2015.

International and National faculties will be providing one to one training to participants in all aspects of facial plastic surgery and to develop the subspecialty of Facial Plastic and Reconstructive surgery amongst colleagues in India.

The course is designed as a 3 day intensive course with hands on dissection. 15 dissectors, 30 observers and limited delegate positions are available on first come first serve basis.
